PROFESSIONAL SUMMARY

Results-driven IT professional and software engineer with **5+ years of hands-on experience** spanning full stack development, database administration, and enterprise IT infrastructure. Proven track record of architecting and deploying production-grade applications, managing multi-site IT operations, and delivering solutions that directly reduce costs and drive business growth. Equally at home writing clean, scalable backend code and resolving complex infrastructure challenges on-site — bringing both technical depth and real-world versatility to every role. Known for strong problem-solving instincts, self-direction, and a consistent ability to exceed expectations independently or as part of a team.

EXPERIENCE

Tecnica Systems

IT PROJECT MANAGER · FIELD SYSTEMS ENGINEER · HELPDESK

- Led end-to-end IT infrastructure deployments for multi-location retail clients, owning project scope, timelines, vendor coordination, and on-site execution
- Architected and maintained Windows Server environments, Active Directory, and virtualization platforms (VMware / Hyper-V) supporting business-critical daily operations
- Integrated third-party delivery platforms (DoorDash, Uber Eats, Instacart) into existing retail POS ecosystems, enabling new revenue streams across client locations
- Managed, repaired, and maintained enterprise hardware fleets including Toshiba self-checkout systems, POS terminals, smart scales, PDAs, and digital display networks
- Configured and hardened network infrastructure including VPN tunnels, firewalls, and LAN/WAN environments ensuring high availability and security compliance
- Progressed from Helpdesk Technician → IT Field Technician → Project Manager through consistent performance and expanding technical ownership

ePhoneSolutions

IT TECHNICIAN

- Diagnosed and repaired smartphones, tablets, laptops, and consumer electronics achieving high first-time fix rates and fast turnaround times
- Provided technical consultation to walk-in customers, translating complex hardware issues into clear actionable recommendations and driving repeat business
- Managed device inventory, parts sourcing, and sales operations in a fast-paced retail service environment
